

Hex-A-Gone

Hex-A-Gone is a completely hexavalent free decorative trivalent chromium electroplating system with wide operating parameters.

COMPLIANT CHEMISTRIES
HYPROTM
HIGH PERFORMANCE COATINGS

Hex-A-Gone is a decorative trivalent chrome plating bath that grants a finish that is comparable to a hexavalent chromium plate while offering numerous advantages. These include being highly forgiving of high metallic impurities and generating large energy savings. Most importantly, health and environmental hazards of hexavalent chrome systems are eliminated with Hex-A-Gone.

Product Features:

- Exceptional throwing power
- Environmentally friendly
- Higher bath efficiency reduces utility requirements
- Operates at low current densities
- Cheaper to operate than hexavalent chromium solutions
- Greatly reduces waste treatment expenses
