

TRIONYX TRIVALENT CHROME

DARK TRIVALENT CHROME

TriOnyx is a process of choice for "special" finishes required in the automotive industry. It produces very dark deposits on all nickel finishes, eliminating the need for hexavalent chromium which reduces waste treatment costs.

FEATURES:

- Excellent for use over a satin nickel deposit
- Consistent color is simple to maintain
- Special graphite anodes eliminate the creation of the lead sludge commonly associated with hexavalent chrome plating
- Provides excellent covering power across all current densities
- Low operational cost
- Acceptable for exterior applications
- Excellent corrosion resistance as plated
- Meets the requirement of RoHS Annex XIV and is an excellent choice when implementing Annex XIV

PRODUCES VERY DARK DEPOSITS, GREAT FOR DECORATIVE FINISHING
